About

Hi, I'm Sagar Patil, a product designer and developer focussed on user experience, and interface design. Most recently, I completed a consultancy with Sauce Labs, identifying critical UX issues and designing a unified experience for their family of tools.

Previously, I led and mentored the Design, Front End and Content teams at BrowserStack, leading the successful redesign of the flagship Live product and establishing a design language that is being used to date.

I have also worked with Sony Music, as the Manager for Technical Operations, Asia, helping online retailers like iTunes and Virgin Music set up secure, automated content delivery services.

Skills

User/Product Experience and User Interface Design using data and user research. Proficient in Front-end coding with SCSS and JavaScript and back-end langauges like PHP and SQL. Experienced with building scalable component libraries/frameworks that reduce deployment time and deliver consistent experiences.

Education

Bachelor of Engineering, Computer Science
Mumbai University
Sep 2001 - Jun 2005

Projects

Designing a unified web and app testing UX
Sauce Labs, *Jun 2019 - Sep 2020*
Designed a single platform for the Sauce Labs testing suite along with instrumenting analytics and building a component library.

Redesigning the Live Testing User Experience
BrowserStack, March 2014 - Nov 2014
